- Engineered for peripheral access to the arterial system.
- Intended use of arterial catheter:
 - Arterial blood pressure monitoring (Continuous, beat to beat IBP measurement).
 - Blood gas sampling (Oxygen and carbon dioxide).

Ease of Placement & Compatability

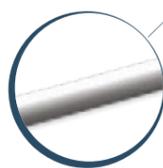

Catheter Tip

Tapered Tip designed smoothly to facilitate smooth access and minimize resistance during insertion.

Catheter Material

- High flexibility & kink resistance Pebax
- low friction coefficient.
- provide consistent catheter performance and resist waveform damping, resulting in more reliable patient monitoring.

Suture Wings

The low-profile, angled suture wing improves patient comfort and supports the catheter insertion angle for optimal positioning.

Extension Set

- Integral extension line
